

Using a model or drawing, show that...

$$\frac{13}{4} = 3\frac{1}{4}$$

Associate each decimal number to the nearest fraction.

2.41

$$\frac{11}{5}$$

$$2\frac{7}{8}$$

2.6275

$$2\frac{1}{3}$$

$$2\frac{5}{8}$$

2.21

Which of these two fractions is the largest?

Demonstrate how to compare these fractions using as many different strategies as possible.

$$\begin{array}{c} < , > \text{ or } = ? \\ \frac{1}{3} \quad \bigcirc \quad \frac{3}{5} \end{array}$$
