

Unified Referral Intake System (URIS) helping through Coronavirus (COVID-19)

The Unified Referral Intake System (URIS) nurse educator acts as a member of a multi-disciplinary team of professionals in Clinical Support Services and is responsible for providing educational awareness of the complexities of children with special health care needs. The URIS nurse works in collaboration with children's families and school programs in First Nation schools. URIS is a program that assists schools in providing a safe and supportive environment for children with special care needs.

Asthma and Covid-19

Individuals who have moderate to severe asthma could be at higher risk of getting very sick from COVID-19. The virus can affect your respiratory tract (nose, throat, lungs), can cause an asthma attack, and can possibly lead to pneumonia and acute respiratory disease.
